Project 4: Behavior

Part I: Series Identification

A sixteen-event robbery pattern has unfolded over the past fifteen months. All but one of the events occurred at a bank, and each event involved the use of a note. Although no specific bank was targeted more than once, there were four events at a Capital One Bank, three events at a BB&T Bank, and two events at a PNC Bank. The suspect is described as a black male and is being referred to as the “[Beltway Bank Bandit](#).” None of the fifteen robberies or the single attempted robbery resulted in any impacted victims. All of these events occurred within the DMV, with ten events occurring in Virginia, four events occurring in Maryland, and two events occurring in the District of Columbia.

Archetype: Bank robberies in the DMV involving the use of a note and no harmed victims.

Part II: Visuals
